

Tableau Creating Sales Dashboard

WEEK 4

Data Science
Academy

HOMEWORK

Disclaimer: While the case is real, data modified for educational purposes.

You have been given sales data of a supplier and its detailed breakdown.

Create a reader friendly dashboard that contains:

1. A map that compares countries by total number of orders. For each Country show Cities as proportion of total number of orders.
2. Total Number of Orders.
3. Total Sales.
4. Total Profit.
5. Graph that illustrates Number of Orders by order date.
6. Proportion of total number of orders by Ship Mode.
7. Titles, labels, tooltips and other possible design elements.
