

Tableau Turbo.az Car Sales Analysis WEEK 3

**Disclaimer: While the case is real, data modified for educational purposes.
Answer the following questions by setting up maximum 1 graph for each question.**

1. Show the relationship between "Yurush" and "Qiymet" by creating Scatter Plot according to "Marka".
2. Create a dynamic set to show top N Models (with a default value of 3) by "Qiymet".
3. Compare BMW and Lexus car prices. Then analyze BMW and Lexus car price difference between new and old models.
4. Murad, who wants to sell his car, thinks that black cars are more expensive. Describe in a visual way whether this idea is true or not. Is this idea true for the three most expensive models?
